PROFESSIONAL SUMMARY

Data Analyst with experience transforming operational, product and business data into actionable insights using SQL, Python, Power BI and Tableau. Skilled in KPI development, dashboarding, data modeling, ETL, segmentation and trend analysis, with experience connecting analytical findings to measurable business outcomes.

EDUCATION

Northeastern University Sep 2025 - May 2027
Master of Science, *Computer Science* GPA: 3.9

Siddaganga Institute of Technology Dec 2021 - Jun 2025
Bachelor of Technology, *Artificial Intelligence and Data Science*

PROJECTS

Real Estate Business Intelligence Platform | SQL Server, Power BI, DAX, Power Query, Python, Pandas

- Built an **end-to-end BI platform using SQL Server and Power BI**, transforming commercial real-estate data into executive reporting across revenue, profitability, occupancy, asset value and sustainability KPIs.
- Designed a **star-schema warehouse with 1 fact table and 8 dimensions**, enabling drill-down analysis across building, customer, location, vendor, date, asset type and energy source.
- Developed **5 interactive Power BI dashboards using DAX and Power Query**, reducing recurring executive reporting effort by 70% across financial, portfolio, sustainability and customer analysis.

People Analytics Data Infrastructure | SQL, BigQuery, dbt, Python, Pandas, Tableau

- Integrated **135K+ workforce records across HRIS, recruiting, performance, engagement and compensation sources** into a centralized BigQuery analytics environment.
- Built **25 dbt models and 8 reporting marts** for attrition, recruiting, compensation, engagement and performance analysis, supporting standardized and ad-hoc workforce reporting.
- Developed **TTM and 3-month rolling KPI calculations, organizational benchmarks and segmented reporting views**, reducing monthly manual reporting effort by 80% for Tableau-ready analytics.

Insight — Real-Time Product Analytics Platform | PostgreSQL, SQL, Kafka, TypeScript, Next.js, Redis, Grafana

- Built a **multi-tenant product-analytics platform** that transformed application events into real-time time-series metrics and live dashboards for behavioral and usage analysis.
- Modeled **append-only event data and aggregated PostgreSQL read models**, maintaining accurate KPI counts under duplicate event delivery through transactional deduplication.
- Enabled **real-time product analytics across 41K+ events** by optimizing event processing from 46 to 2,816 events/sec, a 61× improvement with zero consumer lag.

WORK EXPERIENCE

Siemens | Software Engineer Intern | Remote Aug 2024 - Jul 2025

- Analyzed **AI quality and latency across 10,000 benchmark queries**, achieving 850 ms p95 response latency and identifying performance bottlenecks across retrieval and API stages.
- Evaluated chatbot retrieval quality across **1,200+ production conversations**, improving semantic-search relevance by 40% through a Pinecone-backed RAG pipeline.
- Led 3 engineering interns through **feature analysis and production validation**, resolving 9 issues through log analysis, debugging and service-level investigation.

Unisys | Software Engineering Intern | Remote Apr 2024 - June 2024

- Analyzed **checkout funnels and user-event data using SQL** across 8,000+ users and 1,600+ orders, identifying conversion bottlenecks in a marketplace generating $20K GMV.
- Increased checkout conversion from 41% to 50% (**22% relative improvement**) through **funnel analysis and one-click checkout optimization**, contributing $14K in revenue.
- Increased mobile conversion by **8% through performance analysis and iterative optimization**, reducing page load time to under 1.2 seconds.

Siddaganga Institute of Technology | Research Assistant | Tumkur May 2024 - Jan 2025

- Analyzed experimental results across **5 datasets** to evaluate a quantum-based 2Q learning approach for DDoS detection, achieving 95% detection performance.
- Improved model convergence by **30% through comparative analysis and experimental optimization**, contributing to a peer-reviewed IEEE publication.

SKILLS

Languages & Querying: SQL, Python, Java, C++, TypeScript, JavaScript

Business Intelligence: Power BI, Tableau, DAX, Power Query, Streamlit, Grafana

Data Analysis: KPI Development, Funnel Analysis, Segmentation, Trend Analysis, Cohort Analysis, Exploratory Data Analysis, Data Cleaning, Statistical Analysis

Data Modeling & Transformation: Star Schema, Dimensional Modeling, dbt, ETL, Data Warehousing, Data Validation

Data & Databases: SQL Server, PostgreSQL, BigQuery, Redis, AWS S3

Python Analytics: Pandas, NumPy, Matplotlib, Scikit-learn

CERTIFICATIONS & ACHIEVEMENTS

- Open Source - Merged PR #472 into mindsdb/anton, fixing a bug that deleted saved user rules and adding 3 regression tests. Sep 2026
- Publication - "Detection of DDoS Attacks in Fog Computing using Interpretable Quantum-based 2Q Learning Approach" - IEEE Jan 2025
