PROFESSIONAL SUMMARY

Full Stack engineer with experience building end-to-end web applications using React, TypeScript, Node.js, and PostgreSQL. Expertise in REST APIs, real-time features, cloud deployment, and performance optimization.

EDUCATION

Northeastern University Sep 2025 - May 2027
Master of Science, *Computer Science* GPA: 3.9

Siddaganga Institute of Technology Dec 2021 - Jun 2025
Bachelor of Technology, *Artificial Intelligence and Data Science*

WORK EXPERIENCE

Siemens | Software Engineer Intern | Remote Aug 2024 - Jul 2025

- Engineered 2 **full-stack applications using React, Node.js and PostgreSQL**, integrating REST APIs and authentication to serve 2,500+ users.
- Integrated a **Pinecone-backed RAG pipeline** into an AI chatbot, improving retrieval relevance by 40% and supporting 1,200+ conversations at 850 ms p95 latency.
- **Led 3 interns** through frontend-backend integration and architecture design, resolving 9 production issues through debugging and service-level testing.
- Automated **frontend and backend deployments using Docker, Azure and Vercel CI/CD**, reducing deployment time by 70%, from 20 to 6 minutes.

Unisys | Full Stack Engineering Intern | Remote Apr 2024 - Jun 2024

- Developed a **full-stack digital marketplace** serving 8,000+ users and processing 1,600+ orders, generating $20K in gross merchandise value.
- Increased checkout conversion from 41% to 50% (**22% relative improvement**) through **funnel optimization and one-click checkout**, contributing $14K in revenue.
- Engineered **real-time buyer-seller messaging using WebSockets**, supporting 350 concurrent connections with sub-150 ms latency and 99.8% message delivery.
- Improved mobile conversion by 8% through **Lighthouse-guided rendering and asset optimization**, reducing page load time to under 1.2 seconds.

PROJECTS

InspectIQ — AI-Assisted Vehicle Inspection Platform | React, TypeScript, Node.js, PostgreSQL, AWS, Terraform

- Built a **full-stack vehicle inspection platform** with React web and React Native mobile interfaces, supporting role-based inspection, review, and reporting workflows.
- Integrated **REST APIs and an event-driven AWS pipeline** using Lambda, S3, SQS, and Bedrock for asynchronous image analysis and auditable report generation.
- Automated **end-to-end and visual regression testing** through CI, achieving 92% test coverage and reducing regression-testing time by 40%.

Insight — Real-Time Product Analytics Platform | Next.js, React, TypeScript, NestJS, Kafka, PostgreSQL, Redis

- Developed a **real-time analytics dashboard using Next.js and React**, integrating REST APIs and server-sent events to visualize user activity across tenants.
- Engineered a **Kafka-based event-processing backend** with PostgreSQL aggregation, Redis caching, and idempotent processing for reliable analytics.
- Optimized event-processing throughput by **61×**, from 46 to 2,816 events/sec, using Kafka batch consumption, bulk PostgreSQL writes, and pipelined Redis operations.

Memory Agent — AI-Powered Knowledge Management Platform | Next.js, TypeScript, Node.js, Hono, PostgreSQL, Prisma

- Developed a **full-stack knowledge management application** using Next.js, TypeScript, and Node.js, enabling users to organize and retrieve personal information.
- Implemented **RESTful CRUD APIs, authentication, and PostgreSQL persistence** with Hono and Prisma, supporting 1,000 users and 10,000 stored records.
- Built a **responsive React interface** with reusable components, search, filtering and state management, achieving a Lighthouse performance score of 95+.

SKILLS

Languages: JavaScript, TypeScript, Python, Java, SQL, Go, C++
Frontend: React, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design
Backend: Node.js, NestJS, Hono, FastAPI, Spring Boot, REST APIs, WebSockets
Databases & Messaging: PostgreSQL, Redis, MongoDB, Prisma, Kafka, RabbitMQ
Cloud & Tools: AWS (EC2, S3, Lambda), Azure, Docker, Kubernetes, Git, GitHub Actions, CI/CD, Vercel
Engineering: Authentication, API Integration, Performance Optimization, Automated Testing, Distributed Systems

CERTIFICATIONS & ACHIEVEMENTS

- Open Source - Merged PR #472 into mindsdb/anton, fixing a bug that deleted saved user rules and adding 3 regression tests. Sep 2026
- Publication - "Detection of DDoS Attacks in Fog Computing using Interpretable Quantum-based 2Q Learning Approach" - IEEE Jan 2025
